

Monitor the market, build setups, and
track them in line with Islamic
principles.

Brand foundation

Professional market tools, guided by evidence and Islamic principles.

For whom

Active Muslim traders

Serious users who already understand markets and have their own approach.

What it enables

**Build strategies,
screen assets,
monitor setups**

What it is not

**Not a broker.
No execution.
No black-box
signals.**

Brand personality

Five qualities guide every screen, sentence and interaction.

Clear

Complex information becomes understandable.

Calm

No hype, urgency or trading noise.

Evidence-led

Statuses and alerts show their source.

Principled

Rules are consistent and inspectable.

Transparent

Show sources, dates, limitations, uncertainty, missing conditions and status changes.

Logo and naming

HILAL MARKETS

Typography

Headings · Geometria Medium

Monitor every setup

Short, calm headings in sentence case. Never title case or all caps.

Body and interface · Onest

Onest regular

For body copy, explanations and longer reading.

Onest medium

For navigation, buttons, labels and controlled emphasis.

Geometria · ≥ 43 px

Default tracking

BTC/USDT +5.40% \$64,238.20

Use tabular numerals for market data.

Colour system

A white interface, near-black type and one decisive apple-green focus.

Near-black

#2B2E35

Apple green

#CBFA4D

Accent blue

#95ADED

#FFFFFF

#F5F8FB

#D9FE75

#E2FE96

Colour hierarchy

The product stays quiet. Colour directs attention rather than filling space.

Product interface

White / near-white

Neutral

Focus

Product

Predominantly white

Apple green appears in selected labels, CTAs and focused states. Blue remains a rare supporting detail.

Marketing

Full green is allowed

Use it for covers, campaigns and one high-emphasis section – never as constant product chrome.

Core visual language

Roundness structures the interface. The chamfer identifies the brand.

Product surfaces

Brand accent

Trading-bars pattern

A rare marketing device derived from the logo angle and market rhythm.

Waitlist CTA
Covers
Campaign
graphics

Avoid in

Dashboards
Data tables
Real charts

Surfaces and outlines

Cards remain light, rounded and quietly separated from the background.

Default surface

Low-contrast border

Use a thin outline that is only slightly darker than the surface.
Prefer separation over decoration.

Focused surface

One controlled accent

A selected card may use green in the border, label or small detail – not across every edge and surface.

Minimal shadows. No heavy outlines. No high-contrast card borders.

Voice and terminology

Brand and marketing

Islamic principles

Use in hero copy, descriptors,
introductory sections and campaigns.

Product and methodology

Shariah

Use for screening, methodology,
status changes and evidence details.

Prefer

screened · monitored · evidence · requires review · user-approved rules

Avoid

100% halal · guaranteed profit · winning signal · AI trades for you

Motion and product boundaries

Motion explains progress. It never suggests automatic trade execution.

AI assists. Rules decide. The user approves.

No exchange keys · no custody · no automatic execution · no black-box buy/sell advice

Do and do not

Do

- One clear green focus
- Large, subtle brand frame
- Rounded product surfaces
- Thin low-contrast outlines
- Sentence-case headings
- Evidence and limitations shown

Do not

- Chamfer every component
- Use blue as a primary colour
- Use ALL CAPS or Title Case
- Use people photography
- Use Islamic or crypto clichés
- Promise 100% halal or execution
